

AWP safely migrates from UTM to UKG Dimensions with Align HCM

Client situation

- Although AWP has strong leadership and process knowledge, they have some disparate processes disparate due to acquisitions
- They originally wanted to add 1,500 employees to UKG Pro and UTM from recent acquisitions.
- Align helped AWP assess and strategize that the best approach was to migrate from UTM to Dimensions.

Solution

- Align help implement Dimensions for a 1/1 go-live including the newly acquired 1,500-employees into Pro.
- Adding the UKG Pro Talent and Dimensions Analytics modules in phase 2.
- Align integrated time collection data from legacy systems into Dimensions using custom integrations.

Results

- AWP successfully went live within 6 months and consolidate multiple time systems into a single, unified platform
- As a result of the migration and consolidation, AWP will now have less errors and more consistency with their pay rules and related processes
