

# Slice delivers an improved HR/payroll experience with UKG and Align HCM

## Client spotlight

- 500 employees
- Pizza app/technology
- New York, NY

### Client situation

- Slice operates across three countries and needs an HCM solution that integrated across these countries seamlessly, in line with how they operate their business.
- They were transitioning from a PEO that managed their US HR and payroll functionality and looking for more control over and visibility into their operations and their data.
- Slice also needed training and guidance on bringing payroll functionality in-house for the first time.

### Solution

- Align configured the system to support US payroll, timekeeping, and HR operations while also implementing global HR functionality across Slice's operating countries.
- Simple reports were identified and customized to provide maximum visibility into vital system areas and processes.
- System transparency and flexibility were prioritized, providing the team at Slice the room to grow into their UKG solution and for the solution to grow with them.

### Results

- Slice now has a system they can trust and build upon for the future as they continue to integrate all their HR, payroll, and timekeeping needs across their operating countries.
- Slice is equipped to manage future changes to their operational needs and updates to their system via processes established with maximum ease, flexibility, and user-friendliness in mind.
