

Greenlight gets the greenlight with Align HCM

Client spotlight

Client situation

- Greenlight is a FinTech product that was founded in 2014 with the mission of providing parents with a learning tool to teach their children financial responsibility. With tremendous growth over the past decade, Greenlight chose to migrate from Namely to the UKG Pro suite in 2022. Client goals included a more robust payroll solution and a single platform with more integration capabilities for some external systems.

Solution

- UKG and Align HCM partnered to ensure Greenlight would have a top tier services partner for the implementation of the Pro suite, including WFM and Payroll. Additionally, the tech experts at Align were available to build integrations into the remaining Applicant Tracking System (Lever ATS) and Performance Management system 15Five.

Results

- Align HCM successfully brought Greenlight live on UKG Pro within six months of the engagement beginning. By the summer of 2023, Greenlight had UKG's HR, WFM, and payroll solution at its disposal so that they can spend less time with administrative burdens and more time focusing on their people.

Greenlight

Greenlight Financial is an all-in-one money and safety app for families.

Used by more than 6 million parents and kids, the Greenlight FinTech product empowers parents to raise financially-smart kids.
